LTSV - Rail Data - Lot List

Key	
Ser	The series that each lot number belongs to. A full list of codes is on the LTSV website. As a guide, the first letter indicates the company, the second the type of stock. For example, BW is a BR Wagon lot, while SC is a Southern Railway Carriage lot.
Numbers	The number range used by items to each lot. A letter r after the numbers indicates that some numbers in the given range were used (ie not all numbers), while a figure in brackets eg (2) indicates a second use of stock numbers.
