161	Un-numbered Vehicles - Private Cars

IntroductionAbout this document

This document contains a detailed list of the service vehicles operated by London Transport, its successors and associated companies. It is one of several that take their information from the LTSV website (www.ltsv.com) and is updated to 1st March 2015. The other documents can also be downloaded from the LTSV website and include the following:

- **Part 1** gives a basic list of all known service vehicles
- **Part 3** contains the captioned photographs that have been published on the website (broken down into sections due to size)
- **Part 4** has a list of service vehicle locations and also the news and forum sections from the website

LTSV has accumulated a large amount of information over the years. By making these documents available for download it is hoped that the content can be preserved even if something happens to me or my website.

This document will be re-issued perhaps once or twice a year with updated content. However, for the latest information, please refer to www.ltsv.com.

Whilst part 1 lists the basic details of all vehicles in a tabular format, this part gives more detail and hence uses a single table for each vehicle. The additional information comprises:

- Chassis and body numbers (where known).
- Supplier and disposal details (where known).
- Notes. *This includes items added by contributors to LTSV*
- History. *This will eventually cover the allocations, transfers and other changes that affected each vehicle*

The tables also include a small photograph, where one has been published on LTSV. Note that these photos are included as a guide only and are of low resolution. Larger copies of the photos can be found in the part 3 documents (refer to the number shown underneath each photo to locate it) or on the LTSV website.

Not included are additional photos of each vehicle (except in a few cases where the appearance changed markedly), the licensing dates or the sightings reported. All of these can be found on the website.

The addition of vehicle histories is an ongoing task at present, and many vehicles do not yet have any (or complete) entries. Coverage of the period 1946 to 1982 is virtually complete, other periods are in progress. The sources of the allocation information are either official documents or observations. The former sometimes presents anomalies, such as a vehicle being listed as moving from A to B and then later from C to D. Such instances are notated as 'non-contiguous'. There are also entries that may appear to be duplicated. For example, if two official lists dated 01/01/1961 and 01/01/1962 both showed a vehicle as being allocated to X, both will appear.

If you find any errors in this document, or have any additional information, please get in touch using e-mail tom@ltsv.com.

Thomas Young, Abbey Wood, March 2015

Miscellaneous Numbered Vehicles - Demountable Bodies

	Number	DB 1	Registration

Number	UT1	Registration	
Type	Marshalls Uniform Issue Trailer		
Operator	LT	Livery	Grey
Date in	04/10/1967 from British European Airways		
Date Out	22/08/1974 to LBPG		
Notes	This is most likely ex British European Airways trailer N173, built by Marshalls of Cambridge and taken into stock on 14/03/1967. The variation sheet that shows UT1 taken into stock as a second-hand trailer also shows BEA N173 transferring on loan to LTE on the same date (04/10/1967).. BEA trailer N173 is one of many shown as being "withdrawn to BEA as scrap" on 26/02/1973 following the introduction of the Locomotors J-series trailers. So, either it was returned to BEA following its loan to LTE, or UT1 was in fact a different trailer.. A pencilled addition to the Variation Sheets that I am working with (the ones from John Marshall's website) states that UT1-4 were sold to LBPG on 22/08/1974. Assuming this is the London Bus Preservation Group it would be interesting to know what subsequently happened to these trailers..		
History	04/10/1967 Into stock Works [WKS] n/a, ex BEA trailer N173, on loan to LTE. Listed on 26/10/1967 by 01/09/1972 Allocated to Chiswick Works [CS] Stores Manager (Gp.1), Docked at Turnham Green by 01/01/1974 Allocated to Chiswick Works [CS] Stores Manager (Gp.1), Docked at Turnham Green 27/02/1974 Withdrawn Chiswick Works [CSu] n/a, ex Chiswick. Notes	No longer on DVLA. I believe the registration was originally intended for AEC Merlin MBS615, which was taken into stock at Aldenham in June 1969. LT decided to convert this bus to Red Arrow (MBA) specification before putting it into service, and as a result it was registered AML 615H instead. I presume that when this Cortina arrived LT, knowing that the Merlin wouldn't be ready until after the year-letter change, decided to save a bit of money by giving its intended registration to the car..
